

If your responsibilities include building maintenance,
that's not all you're responsible for.

Help prevent mold growth with VaporWick® Pipe Insulation. Condensation is a leading cause of mold, which damages buildings, increases maintenance costs and threatens the health of building inhabitants. Owens Corning VaporWick Pipe Insulation is specially designed to manage condensed water from chilled water pipe systems, which helps to prevent mold damage. For more information, call **1-800-GET-PINK** or visit www.owenscorning.com/vaporwick.
